

2010 National Survey of Substance Abuse Treatment Services (N-SSATS) Census Regional Report

Clients aged 18 or older in treatment for substance abuse only, per 100,000 population, by U.S. Census division

The National Survey of Substance Abuse Treatment Services (N-SSATS) is an annual census of facilities in the United States, both public and private, that provide substance abuse treatment. Each year, about 17,000 facilities are surveyed, and information is collected on their location, characteristics, and use of alcohol and drug treatment facilities and services throughout the 50 States, the District of Columbia, and other U.S. jurisdictions.

This report focuses on the rate, per 100,000 population, of clients in treatment for substance abuse by U.S. Census division (Figure 1). There are 9 U.S. Census regional divisions (Pacific, Mountain, West North Central, West South Central, East North Central, East South Central, New England, Middle Atlantic, and South Atlantic). The data presented in this report is based on 13,339 facilities that responded to the N-SSATS survey.

Figure 1. Median number of clients aged 18 or older in treatment, by drug and alcohol abuse, by U.S. Census divisions

	Pacific	Mountain	West North Central	West South Central	East North Central	East South Central	New England	Middle Atlantic	South Atlantic
Alcohol abuse only	313	199	200	193	157	145	128	266	263
Drugs abuse only	370	221	143	84	199	166	119	160	158
Alcohol and drug abuse	123	66	91	85	77	48	34	130	163

Figure 2. Clients aged 18 or older in treatment for drug abuse only, per 100,000 population, by U.S. Census divisions

The rates of clients in treatment for drug abuse only were higher than the national rate for all States in two divisions: New England (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont) and Middle Atlantic (New Jersey, New York, and Pennsylvania). On the other hand, the rates of clients for drug abuse only were lower than the national rate for all States in three divisions: East North Central (Michigan, Illinois, Indiana, Wisconsin, and Ohio), West North Central (Missouri, Kansas, Minnesota, Nebraska, Iowa, South Dakota, and North Dakota), and West South Central (Oklahoma, Louisiana, Texas, and Arkansas).

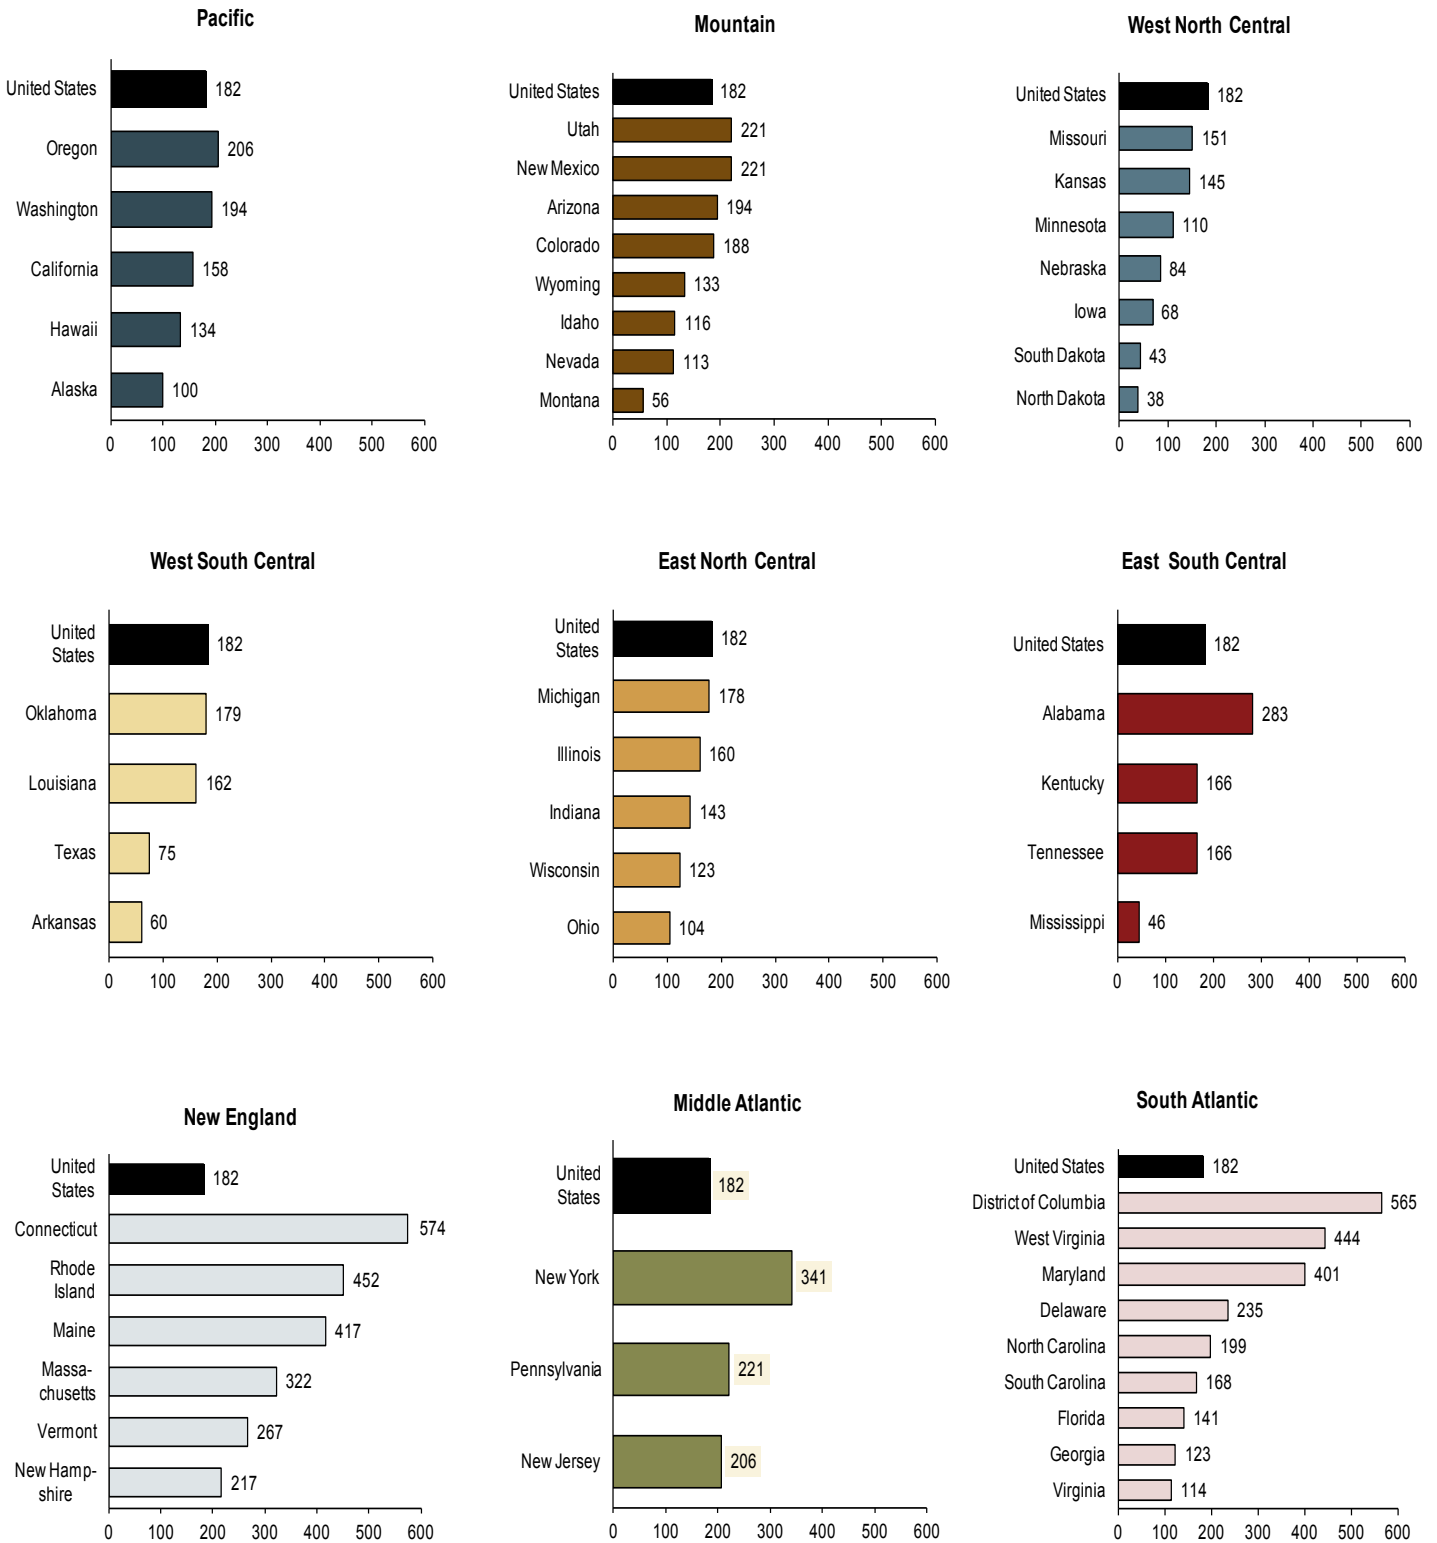

Figure 3. State or jurisdiction per division with the highest rate of clients in treatment for drug abuse only, per 100,000 population: 2010

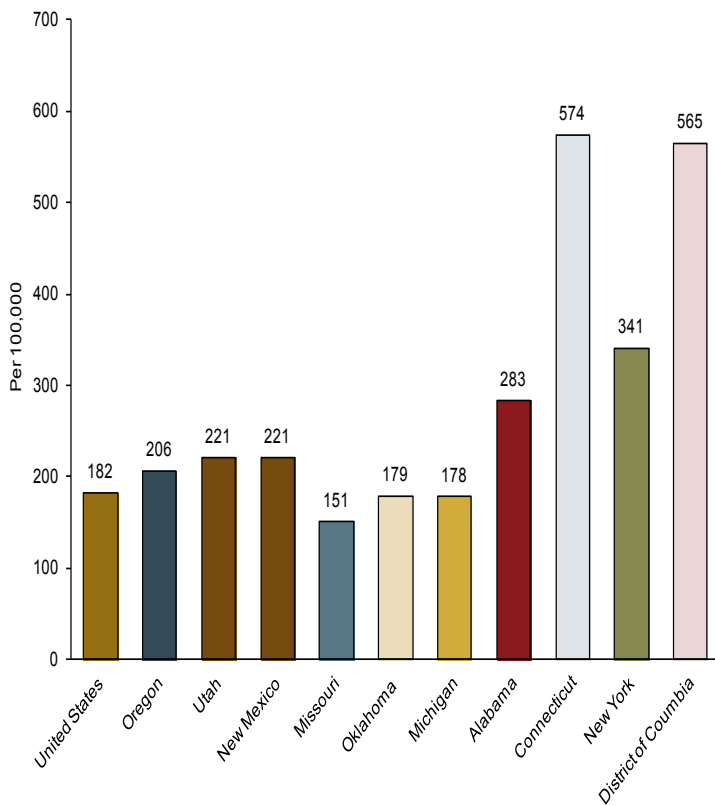

Figure 4. State or jurisdiction per division with the lowest rate of clients in treatment for drug abuse only, per 100,000 population: 2010

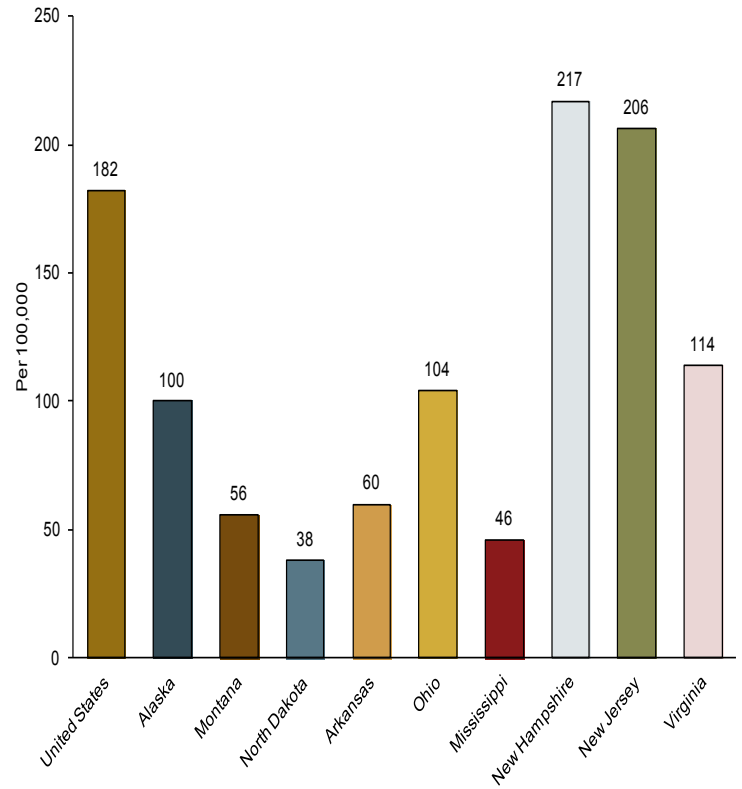

Figure 5. Proportion of U.S. Census divisions' clients in treatment for drug abuse only, alcohol and drug abuse, and alcohol only, by State or jurisdiction, compared with the total United States proportion

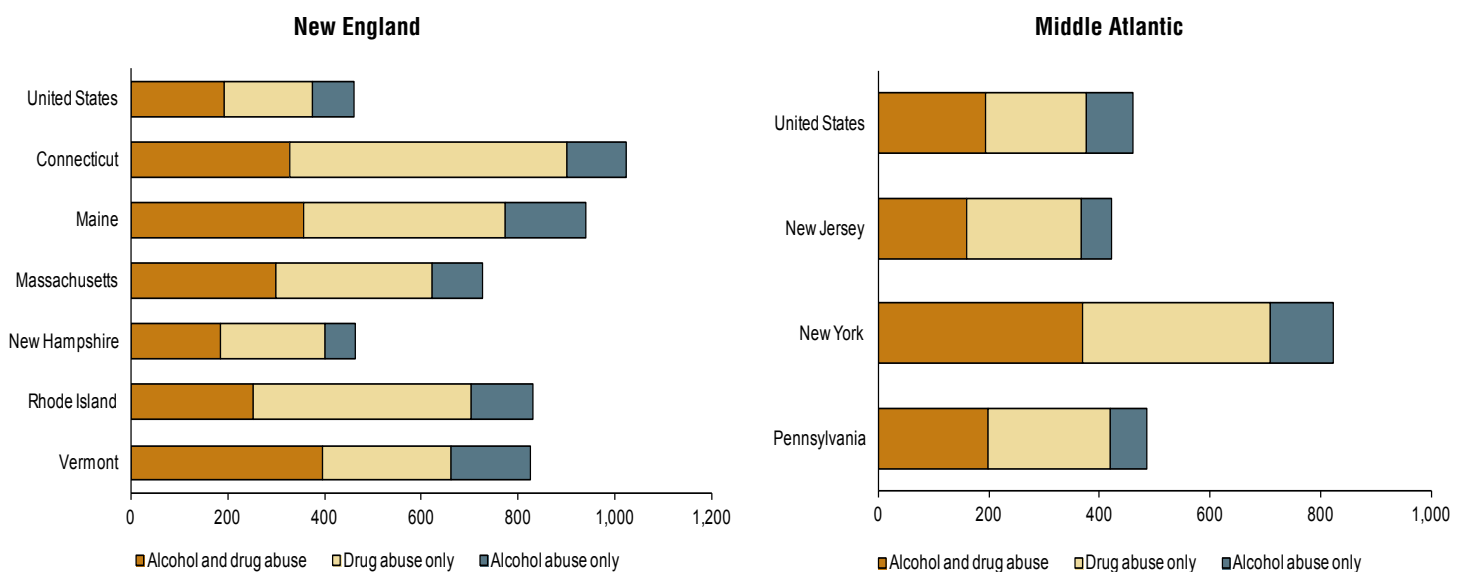

Figure 5 (continued). Proportion of U.S. Census divisions' clients in treatment for drug abuse only, alcohol and drug abuse, and alcohol only, by State or jurisdiction, compared with the total United States proportion
